About Cystic Fibrosis Canada

Cystic Fibrosis Canada (CF Canada) is a national charitable organization founded in 1960 and is one of the world's leading charitable organizations committed to finding a cure for cystic fibrosis (CF). As an internationally recognized leader in funding innovation and clinical care, CF Canada invests more in life-saving CF research and care than any other non-governmental agency in Canada.

Since establishment, CF Canada has invested more than \$261 million in leading research, innovation and care. As a result, Canadians with cystic fibrosis have one of the highest median survival rates in the world.

CF is the most common fatal genetic disease affecting Canadian children and young adults. It is estimated that one in every 3,600 children born in Canada has cystic fibrosis. There is no cure.

CF Canada achievements include:

- Funded the research responsible for the discovery of the CF gene in collaboration with CFF.
- The world's first successful double lung transplant on a person with CF took place in Toronto.
- Understanding the role of diet in disease control.
- A \$7M CFIT campaign with SickKids Foundation.

CF Canada currently raises \$17M dollars annually with the support of a highly passionate group of national staff, volunteers and parents.
